

Twinzer RD (Red Dot)

A new Board Concept hits the market – The Evolution of the Mistral Twin Fin Range “TWINZER” enables you to a complete unique waveriding sensation. From now on you can set the bottom-turn as vertical as a professional and hit the critical part of the wave. Even the smallest waves are now fun to ride, as the increased vee in the back matches perfectly with the CNC foiled G10 twin fins making the board so easy to turn in all kind of wave conditions. This board is just sheer-riding-pleasure: you never loose control and always manage to stay at the best part of the wave. From today on, fearing spin outs on lay down bottom turns is history.

Summary:

- Pure Waveriding Sensation
- Sheer-Riding-Pleasure
- Vertical Cut-Backs
- Increased Vee for easier rail to rail turning
